

Camp Sugarbush Geocache

There are 12 geocaches placed on the camp property; be prepared to trek all over camp to find them all! There are 10 geocaches that are small containers that contain a logbook and 2 Treasure Caches which have small trinkets for swapping. Please only take a Swap if you leave one in its place.

To find these geocaches you will need a maps app on your phone. Google maps work well. Simply enter the Decimal Degrees below into the search bar, and it will show you the location marked with a pin.

When getting to these locations we ask that you stick to the roads and trails. Some locations may be just off the trail.

The pin will get you close to the location where you will need to search for the container. The clue is helpful to pinpoint the location. Try your best to use the location to find the cache and only use the clue when needed.

Place the cache back in the same location you found it so the next geocachers will be able to find it.

Geocache Clues:

1. On the road you drive right past unless I am closed.
41.387, -80.58901667
